F&O GDPR accelerator

**Bring transparency and trust with your customers and suppliers whilst meeting data protection legal requirements.**

Microsoft | Dynamics 365

If you are responsible for data and privacy within your organization you will be aware of the need for compliance within your ERP.

Personally identifiable information (PII)

Traditional identifying data	Non-traditional identifying data
Name	E-mail address
ID number	IP address
Home Address	Geolocation data
Picture/Video	Generic information

Purchase order • Financial details • Invoice • Last connecton • Outstanding debt

Personally identifiable information (PII) is what we typically think about when we think "personal data". This includes both traditional (name, phone number) and newer (email, IP address) identifiers.

All information you have about a physical person is personal data too.

Why choose GDPR accelerator for F&O by Prodware?

To get you up and running with GDPR compliance quickly, we have brought together our experience of Microsoft Dynamics AX and F&O, along with our GDPR business consulting know-how, to develop an out-of-the-box add-on to your standard system.

The GDPR accelerator for Dynamics AX and Dynamics 365 for Finance and Operations enables organizations' ERP to be compliant with GDPR regulations.
Upon receipt of a personal information request, you can:
- Log data subject right (DSR) request
- Identify subject's personal data
- Print subject's personal data
- Export subject's personal data
- Complete personal data
- Erase personal data (anonymization)

Version compatibility

Dynamics AX 2009
(Accelerator retro fits standard with no GDPR functionality)

Dynamics AX 2012
(Accelerator retro fits standard with no GDPR functionality)

Dynamics 365 for Finance and Operations
(Accelerator boosts standard GDPR functionality)
