

Manage your project planning and actions from one WBS screen within Dynamics 365.

If you are responsible for project management and sales processes in your business, you may recognize these challenges:

“Triggering of needs or material consumption (e.g. purchase orders, production orders etc.) is carried out in another screen that makes actions within a process burdensome.”

“As a Project Manager it is frustrating because our standard Dynamics 365 functionality means that I have to switch between screens and to enter the same information several times in order to manage projects.”

“I would like to be able to split an existing project task into several sub-tasks. Even better these tasks would need to inherit key information from the master task to save time.”

### Why choose Prodware to support your project management needs in Dynamics 365 Finance & Operations?

As a Microsoft partner, Prodware has developed and implemented Dynamics 365 and AX projects across Europe.

Our experienced R&D team work closely with our clients to develop additional functionalities that suit their project management and process needs to boost efficiency and productivity.

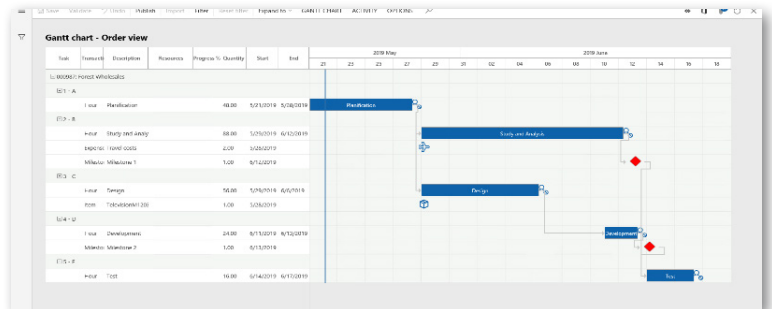

### The Project WBS Management accelerator helps by boosting standard Microsoft Dynamics 365 Finance and Operations

functionality:

- A single Work Breakdown Structure (WBS) screen helps to organize the work (hours, expenses, items consumption) over time.
- Within the WBS screen; a “View” menu and an “Actions” menu have been added into the “Cost estimates” view
- The user can launch actions directly from WBS, without leaving the navigation screen and switching screens.

### Actions directly available from the WBS screen

- ✓ Create item requirement
- ✓ Create purchase order
- ✓ Create production order
- ✓ Packing slip generation
- ✓ Create service order
- ✓ Create purchase order stock project
- ✓ Create production order stock project
