

## Connect your Dynamics 365 for Finance and Operations system with the Hedgewiz currency risk management app to assess the risk and align your hedging activity with real time business

If you want to ensure that your currency risk management strategies aligned with your business goals and based on transactional data within your business operations, you are likely to encounter these challenges:

“As a management team, we need to understand the full impact of our global supply chain and customer base. Dealing with multiple currencies in import and export means that our exposure to markets volatility is greater.”

“As a mid-size company we use excel spreadsheets to calculate our exposure and build hedging approach; this gets complicated when dealing with additional currencies. My finance team finds it a heavy administrative burden to keep on top of fluctuations in this market.”

“As a Treasurer I don’t often access our ERP, so the key data held within it isn’t always visible to me in real time. Of course, this data would affect hedging decisions. I should always be instantly updated on any information impacting my risk management.”

**The Hedgewiz Connector from Prodware is the answer: it brings key data from your Dynamics 365 into leading currency hedging technology.**

### Why choose Hedgewiz Connector from Prodware to support your risk management strategies?

Hedgewiz is a simple yet comprehensive online hedging platform for all aspects of corporate FX risk management. It identifies currency risks and assists in adopting and execution of hedging policy.

With Hedgewiz, businesses understand and manage their currency exposures so they can focus on delivering operational excellence.

With thousands of customers that we have helped in finance and operational functions, Prodware’s global experience in ERP technologies means that we can match our Microsoft Dynamics expertise with innovative apps such as Hedgewiz to further boost your growth strategies.

The **Hedgewiz** Connector from **Prodware** helps you transform key purchase, sales and project data in your **Microsoft Dynamics 365** for Finance and Operations system into a currency hedging strategy:

- Visualize FX exposures based on business data. Hedgewiz uses AI and analytic tools to design a strategy that best fits YOUR business needs
- Ditch those spreadsheets and double entry admin, monitor your currency exposure based on real time business data from Dynamics 365
- The Hedgewiz online platform helps you instantly control the implementation of your hedging plan. Cut down on admin steps and connect with FX providers to execute transactions seamlessly
- Generate management and accounting reports to review & share FX hedging results straight from the platform

### Improved insight & control

Helps financial directors to identify and manage the company's currency risk, increase certainty and support growth. Design a tailored hedging plan according to needs, business model and risk aversion.

### Improves efficiency & productivity

Reduces hedging burden, saves time and improves compliance and control. Eliminates mistakes by replacing spreadsheets with an automated solution. Focus on strategy instead of complex files maintenance.

### Boosts accuracy & profits

Hedgewiz saves hedging costs based on accurate market data. Plus, with your operational data being fed directly into the platform with the Prodware Connector for F&O, your hedging decisions are kept super relevant.

### Comprehensive reporting out-of-the-box

In multi-local, multi-currency supply chain operations? Monitor and create clear and transparent management reporting to assure supervision and control over hedging process.

## Generate and send currency transactions from Dynamics 365 to Hedgewiz

Easy set up means you can choose the frequency and type of the data to be sent to the online platform.
