

## Practical steps including training and an action plan to set up your BI and analytics practice

If you want to take better advantage of your business metrics and be able to make data-driven decisions, you are likely to encounter these challenges:

"We collect lots of data from our business operations, but we are not taking advantage of it to gain valuable insights. Where do we start?"

"Our staff should be able to organize our data and create advanced reports and dashboards so we start to get value from our data."

"We need a holistic service that will be relevant to real-life business and will equip us with skills and a plan for the long-term."

**The Power BI Workshop from Prodware is the answer: to transform your business into taking data-driven decisions that give you a competitive edge and help you grow**

### Why choose Power BI Workshop from Prodware to support your business intelligence journey?

Setting up a BI practice with no guidance is not easy; there are many Power BI courses (both online and in-person) but they focus on the tool's functionality with little insight into how to work with actual business data.

With more than 200 BI projects for customers all over the world, Prodware are able to distil our experience of data in business into this practical workshop. You will learn not only how to use the tools at your disposal, but also how to get valuable insights from your data.

The Power BI Workshop is set as either a three or a five-day service, depending on your business needs:

- Kick-start your Business Intelligence operations
- Learn how to get the most out of your Power BI setup
- Analyze your business data and create useful reports and dashboards
- Discover insights that allow you to optimize your business

## EXPLORE

- Discuss business data infrastructure and relationships
- Identify KPIs
- Access your data sources

## ANALYZE

- Work together and create reports and dashboards from customer data
- Explore different analysis tools and visualization options

## REVIEW

- Review work from analysis phase
- Explanation of evolution of existing reports
- Learn other advanced Power BI tools and features

### Outcomes and deliverables

#### TRAINING

- Power BI capabilities
- Business data handling
- Visualization techniques

#### BI

Ready to use reports and dashboards based on your data

#### DOCUMENTATION

Power BI guide to support your team post-workshop

Get on the right track to improve your financial performance, inform your decision-making and execute plans more efficiently with Power BI.
