

Achieve more control and visibility when searching for multiple product variants within your Dynamics 365 system

If your business produces or manages a complex product range with multiple variants, you will recognize these issues during production, sales and inventory processes:

“It’s challenging and very time consuming for us to manage and view product variants.”

“We would like to define and classify our products in a more detailed way in order to see variants, categories and products.”

Why choose Prodware to support your business process needs in Microsoft Dynamics 365 Finance and Supply Chain Management?

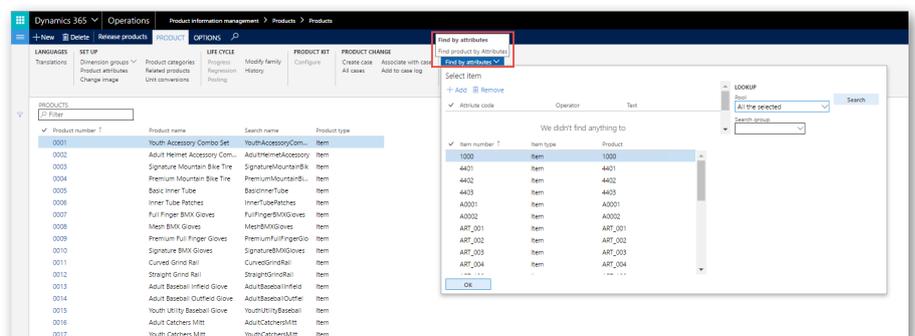

As a Microsoft partner, Prodware has developed and implemented multiple Dynamics 365 Finance and Supply Chain Management and AX projects across Europe.

Our experienced R&D team work closely with our clients to develop additional functionalities that suit their multiple product management needs.

The Product Search accelerator for Dynamics 365 Finance and Supply Chain Management helps by:

- New query tools to find a product or a released product on the standard forms:
 - Product and released product
 - Sales order, sales quotation
 - Purchase order
- Attributes management by variant
- Multiple attributes management by category to more easily find the right attribute
- Item search improvement

- ✓ Find your product with an attribute value query easily
- ✓ Sales line creation has the same functionality
- ✓ Define attributes variant by variant

Speak to Prodware about getting your Microsoft Dynamics system fully compliant with your product management needs.
