

Connect multiple warehouses and systems throughout production and inventory processes with your Dynamics 365 system.

If you run multiple warehouses across your business, you may recognize these challenges:

“We have external WMS and warehouses and need a robust connection between them and our Dynamics 365 F&O system.”

“We need additional controls in place for our sales teams on affected system fields (Block or Allow) that are impacted by the WMS, (for example stock quantity, delivery date etc.)”

“It would save a lot of time if the system automatically allows the user to choose the most appropriate warehouse.”

Why choose Prodware to support your warehouse management needs in Microsoft Dynamics 365 Finance & Operations?

As a Microsoft partner, Prodware has developed and implemented Dynamics 365 and AX projects across Europe.

Our experienced R&D team work closely with our clients to develop additional functionalities that suit their inventory management needs.

The WMS Connect accelerator helps by providing an additional 9 interfaces with your external WMS and integrating key areas of Dynamics 365 Finance and Operations:

- Product, customer and supplier
- Receipt of goods
- Goods delivery
- Stock Management and synchronization

Key touchpoints in your process

Speak to Prodware about getting your Microsoft Dynamics 365 Finance and Operations system fully aligned with your own stock visibility and control needs.
