### Growth in consolidated sales in 2018

In 2018, Prodware's business amounted to € 175.9 million compared with € 167.7 million in 2017, a gain of 4.9%. On a like-for-like basis, revenue grew by 4.1%.

Prodware benefits from the dynamics of its international sales, which grew by 17%, driven by Germany, Spain and Belux. International sales of € 106.6 million now represent 60.6% of the annual total.

Up 12.1%, the recurring business (maintenance, hosting and SaaS) reached € 67.6m, or 38% of the Group's business.

### Increase in EBITDA margin

In 2018, EBITDA grew by 8.4%, driven by higher Group sales and good control of operating expenses. A special effort was made to reduce subcontracting costs and improve productivity related to the development of nearshore resources, which represent 17% of the workforce in 2018. At the same time, Prodware continued to invest in its human capital, including key recruitments in management positions and in areas related to new technologies (artificial intelligence, internet of things, etc.). In this perspective, the share of personnel expenses relative to income increases by one point.

With a R&D tax credit level equivalent to that of 2017, EBITDA would have grown by 17.9% on a like-to-like basis to € 36.2 million (20.6% of sales in 2018).

Operating Profit is up 12.1%. It includes an unfavourable base effect related to reversals of litigation provisions in 2017 for € 2.7 million and also a significant reduction in non-current operating expenses of € 2.5 million, which corresponded to the disposal expenses of € 2.5 million of non-core business activity.

Financial result stood at € -8.3 million in 2018, compared with € -4.4 million in 2017. It takes into account € 3.3 million of extraordinary charges related, first, to the refinancing cost in August 2018 of the mid and long-term debt of Prodware for € 1.7 million, and secondly, the depreciation of certain financial investments for € 1.6 million. These non-recurring expenses include the costs related to the setting up of the new debt as well as prepayment penalties on the old bond debt.

Consequently net income attributable to equity holders of the parent amounted to € 9.1 million, down 21.2% on the previous year. Restated for the exceptional financial items explained above, this net would have been € 12.4 million, an increase of 6.9%.

### A strengthened balance sheet structure

At December 31, 2018, Prodware's balance sheet structure shows shareholders' equity of € 138.2 million, up 6.0% compared to December 31, 2017.

At the same time, Prodware has improved its financial structure by increasing the nominal amount of its term debt to € 92.5m (not fully drawn at the end of 2018), extending the maturity to 6 and 7 years and reducing the interest rate, allowing the Group to grow organically and through external growth on a confident manner.

### Outlook

Prodware will continue to grow its business by focusing on high value-added opportunities, such as sales of SaaS solutions and consulting, thanks to the contribution of its strategic partnerships and the expertise of its 1325 talented employees. The numerous opportunities offered by the digital transformation of its customers, to which the Prodware Group responds perfectly with its Innovative Solutions department, enable it to develop a robust, sustainable and profitable business model.

**Next publication:** Revenues for 1<sup>st</sup> quarter 2019: 14 May 2019 after close of trading.
