

Optimize Your SAP Environment with Microsoft Power Platform, Co-Creation Teams, and Citizen Development

Unlock the Full Potential of SAP Without Costly Customization

If your organization relies on SAP for enterprise resource planning, you understand the need for efficiency and flexibility. As a trusted Microsoft Power Platform partner, Prodware offers an innovative approach to optimizing your SAP environment—without major system overhauls or expensive custom projects. Our solutions focus on cost savings, customer engagement, and fostering citizen development within your organization.

Why Choose Prodware and Power Platform?

01 Seamless Collaboration with Co-Creation Teams

At Prodware, we believe in working alongside your teams to create tailored solutions. Our **Co-Creation Teams** collaborate closely with your internal experts to understand your business needs, ensuring fast implementation and real impact. Through co-creation, we empower your teams with the tools and expertise to develop their own solutions, perfectly aligned with day-to-day operational demands.

02 Enhance and Extend Your Existing ERP Without Complexity

With Power Platform, you can optimize and extend your SAP environment without investing in costly and time-consuming customizations.

- o Power Apps: Enable non-technical users to build applications that integrate seamlessly with SAP, offering flexibility and adaptability to evolving business needs.

- o Power Automate: Streamline workflows and automate repetitive tasks, freeing up your team to focus on strategic initiatives while reducing human errors.

- o Power BI: Unlock deep insights with powerful visualizations, helping you make faster, data-driven decisions.

03 Boost Customer Engagement with Copilot and Power Pages

- o **Copilot:** AI-powered assistance to enhance employee productivity, automate tasks, and improve customer interactions.

- o **Power Pages:** Create interactive customer portals for a seamless experience, enabling self-service and providing valuable customer insights.

04 Reduce Costs & Accelerate Citizen Development

By leveraging the low-code capabilities of Power Platform, organizations can significantly reduce development costs. Employees without a technical background can build applications and automation solutions, fostering innovation and increasing internal engagement.

- o Lower dependency on third-party developers

- o Faster deployment of solutions

- o Reduced operational costs and faster time-to-market

05 Flexible Integration—Cloud or On-Premises

Whether you operate fully in the cloud, maintain a hybrid setup, or still rely on on-premises systems, **Prodware ensures seamless Power Platform integration** with your SAP environment. You maintain flexibility while ensuring performance and security.

Why Prodware?

Leading Microsoft Partner: As the No. 1 partner for Microsoft Power Platform, we have the experience and expertise to help your organization realize its digital ambitions.

Pragmatic, solutions that suit you: We look at the specific needs of your business, so you get maximum value from your technology investments.

Focus on collaboration and growth opportunities: With our Co-Creation Teams, we ensure close collaboration and knowledge transfer, so that your team becomes self-reliant and can continuously innovate.

Real-World Impact: Case Studies

Scenario 1: Faster Purchase Order Approvals

Challenge: A retail company struggled with slow purchase order approvals in SAP, requiring managers to log in and navigate multiple screens.

Solution: With **Power Apps**, managers now approve purchase orders from their mobile devices without needing direct SAP access. **Power Automate** sends real-time notifications, and approvals instantly update SAP records.

Result: Approval cycles were reduced by **50%**, improving responsiveness to market demand while reducing the IT department's workload.

Scenario 2: Automated Customer Service Requests

Challenge: A service company manually processed hundreds of daily service requests, causing delays and long response times.

Solution: **Power Automate** logs requests automatically when an email or form is submitted. Employees use a **Power App** to track request status, and automated responses keep customers informed.

Result: Processing time decreased by **40%**, improving response times, enhancing customer satisfaction, and reducing manual data entry errors.

Ready to Optimize Your SAP Environment?

Let's discuss how you can drive efficiently, save costs, and foster innovation with the **Microsoft Power Platform**. Contact us for a **personal consultation**, and let's build a strategy that aligns with your business goals.
