

Improve supply chain efficiencies with information exchange from within your Dynamics system

If you are dealing with information flow processes between suppliers, partners and customers in supply chain, you will recognize these issues:

"The modern supply chain is no longer linear and simple, we need the controls in place to streamline correct data exchange between all parties."

"With the exchange of information going in many directions and so quickly, it is harder to track and monitor activities and documents."

"It is very important that every link in the supply chain is performing optimally and is up to speed, we need to be able to surface that information quickly and easily."

EDI accelerator helps by ensuring a smooth communication flow throughout the supply chain with supporting documentation and information pushed to key users without the need for manual checking, importing and re-keying:

- Managing 12 standard documents in customer mirror / vendor for messages ORDER, ORDRSP, DESADV, INVOIC, PRICAT and for subcontracting logistics RECADV and INVRPT
- Ability to set outgoing messages for customers and suppliers
- Monitoring import/export
- Monitoring document management
- Ability to modify source data (before import) of the document (after import) to replay processing
- Out-of-the-box for Microsoft Dynamics 365 Finance and Supply Chain Management

To reflect the way you work, you can opt to install any of the accelerators separately or all three as a pack; depending on your needs

5 messages:

- Orders receipt requested by customer
- Sending purchasing orders
- Sending packing slip to customer
- Sending customer invoices
- Sending trade agreements

2 messages:

- Receiving advisory message (Purchase and transfer order receipt)
- Inventory report (Adjustment and counting journal)

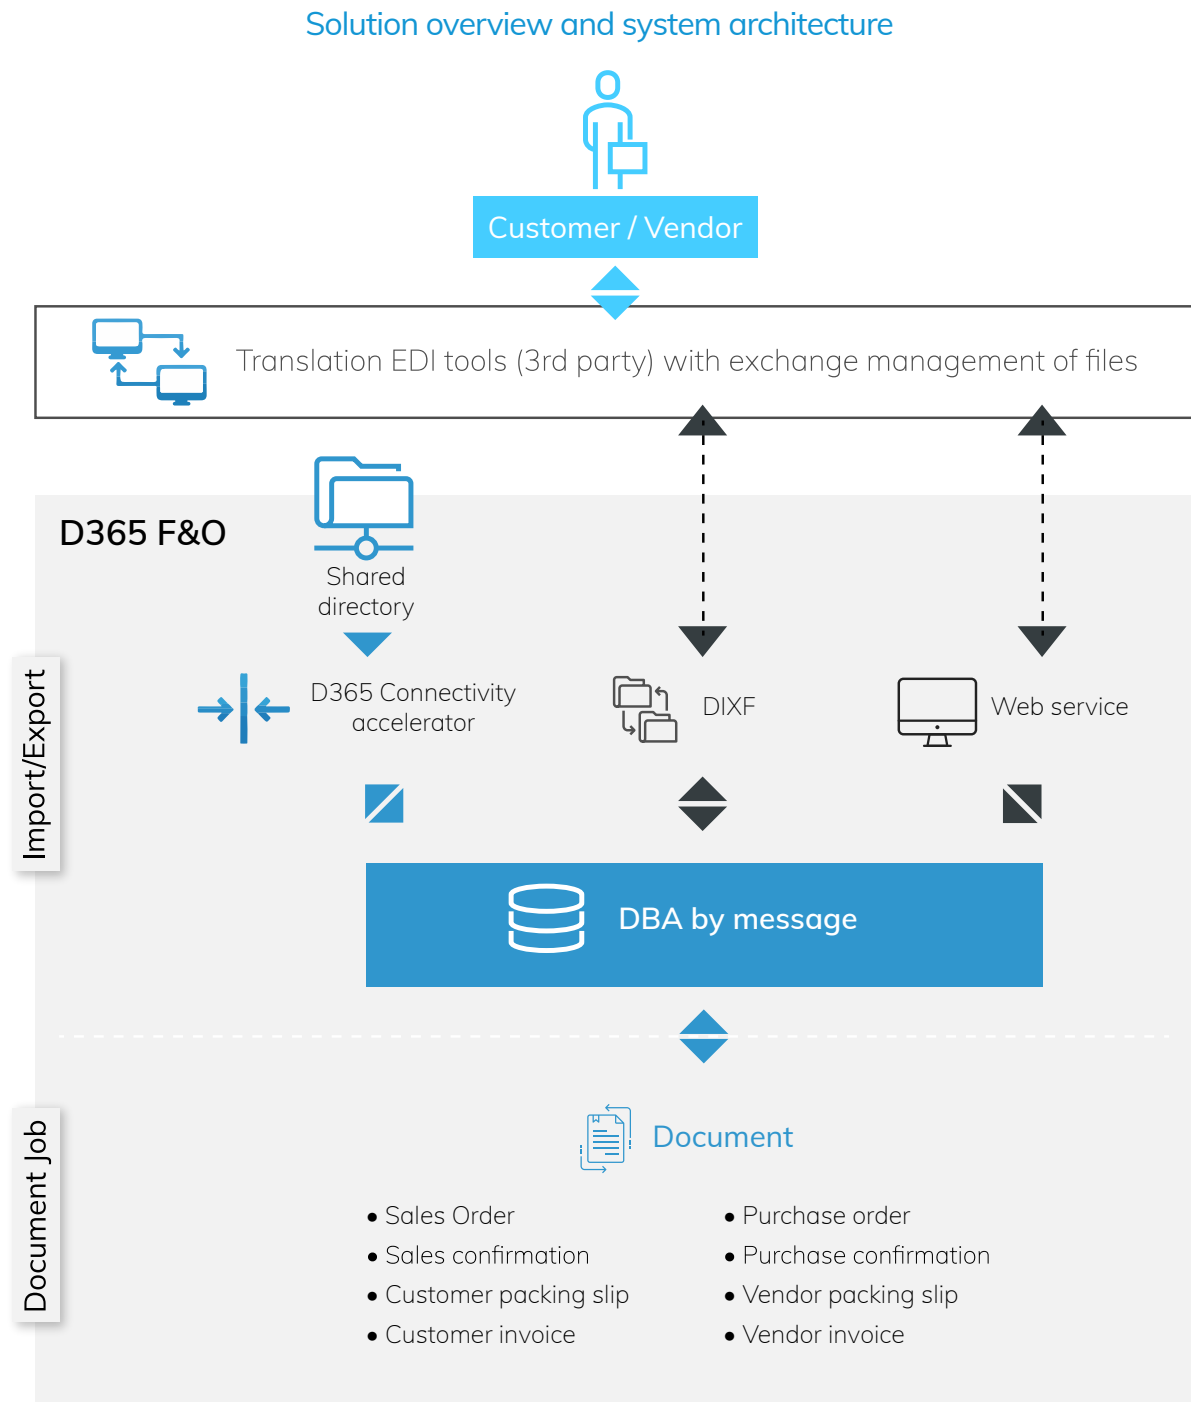

7 messages:

- Sending delivery forecast to vendors
- Releasing orders
- Sending orders
- Order confirmations
- Delivery notes from vendor
- Vendor invoices
- Trade agreements from vendor

Why choose Prodware to support your supply chain needs in Microsoft Dynamics 365 Finance and Supply Chain Management?

As a Microsoft partner, Prodware has developed and implemented Dynamics 365 projects across Europe. Our experienced R&D team work closely with our clients to develop additional functionalities that suit their own supply chain efficiency needs.

Speak to Prodware about getting your Microsoft Dynamics system fully compliant with your supply chain data management needs.
