

Realize your potential on the production floor

If you are responsible for how you ensure the smooth and optimal running of production processes; you will recognize these challenges:

As a Production Manager, I find it frustrating to have frequent machine downtime, and when we are up and running our wastage is higher than acceptable and machine utilization is low."

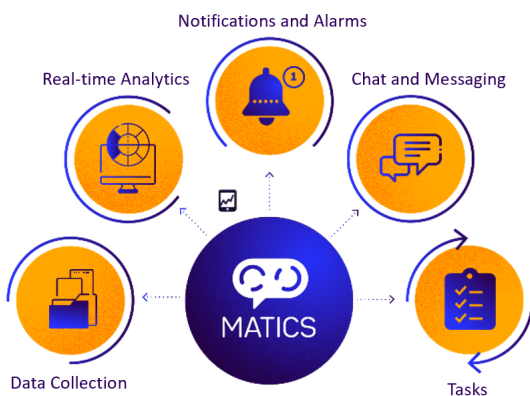

"As a Production Supervisor I feel that my admin is setting us back; I use excel spreadsheets to manage my part of the production floor and as a result it takes a while to share data with colleagues and we are not notified of issues on real time."

Manufacturers need technology for their workers so that they can see and solve problems in real-time. Matics is the answer. It is a leading provider of smart-manufacturing software technologies for holistic, remote-management and team-collaboration of the production-floor.

Why use Matics to support factory transformation?

Manufacturing companies must incorporate continuous real-time management and collaboration, in order to become more agile, lean and competitive. Matics can turn any facility into a smart agile factory. From legacy machines factories to modern multi-factories hi-tech set-ups.

By connecting your data (including production, BOM, job and routing) from within Microsoft Dynamics 365 you can integrate key information from within your ERP.

 Matics is designed as a suite of smart connected applications tailored to the needs of each stakeholder from management to line workers, planners, technicians, and quality control managers with an intuitive and user-friendly interface.

- **Plug and play.** Deploy within hours, start delivering ROI immediately
- **Agile and flexible.** A modular solution that allows you to grow and expand at your own pace
- **Smart connected apps.** Tailored to the needs of each role and facilitates collaboration across groups
- **Communication and notifications.** Get smart alerts on critical issues that demand your attention in real time
- **Dynamics 365 integration.** Our Connector ensures key ERP data is exchanged with Matics for optimal collaboration.

Benefits of using Matics on your production floor

25%

increase in Machine Utilization (OEE)

10%

decrease in energy consumption

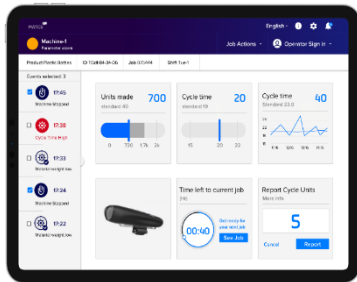

3%

decrease in large material waste

30%

decrease in rejects

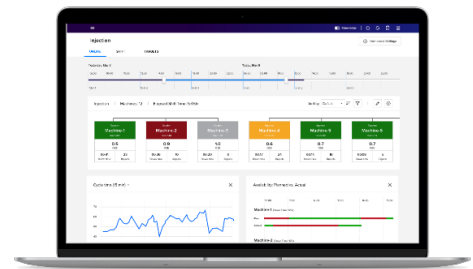

Tailored and flexible to your team's needs
