

Security Assessment

Collaboration tools

A service to help you evaluating your security regarding Office 365 or Microsoft 365

If you are responsible for your organization's collaboration landscape, you will recognize these challenges when adopting leading solutions to boost collaboration in the modern workplace:

"As a CIO, it's of prime importance for my team to provide the tools and strategies to our business that improve their daily work. We need to remain vigilant about how our tools are accessed, who has access to data and if we are using best practice."

"As a business manager I need to ensure that my workers increase their efficiency through strong collaboration tools and practices without compromising my business data and security."

The **Security Assessment** service for **Microsoft 365 collaboration tools** is a 2-day workshop that helps CIOs and their IT teams understand their security risks and create an action plan to mitigate these to make the best use of the security solutions available.

Why choose Prodware to support your IT security strategy?

As a Microsoft Gold partner and trusted Managed Services provider, Prodware helps our customers with Microsoft 365 and support / monitoring projects across Europe.

We understand that embracing innovation, with the move to the cloud, with demands on greater connectivity and reliance on digital tools from increasingly remote teams, are more common today than ever before.

Our consultants will deliver a record of the workshop that identified the risks, along with an action plan including a priority list of activities for any corrective work to be done. If you need support after the Workshop you can engage our support team to ensure you keep on the right path.

The Security Assessment workshop over two days covers these areas:

- Identity management
- Communications compliance
- Mail traffic analysis
- Review of security strategies
- License review
- Security level measurement (Microsoft Secure Score)
- Evaluation of the protection against data loss (Microsoft Data Loss Prevention)
- Analysis of information protection using the Microsoft Azure Information Protect module

Contact Prodware to help you safely enjoy the collaborative tools and systems available to your teams for better connectivity and productivity.
