 Retail

Reduce complexity managing products and suppliers to improve supply chain agility and provide great customer experiences

The Retail solution for Microsoft Dynamics 365 Finance and Supply Chain Management allows your retail supply chain to optimize your data and processes across procurement, store, sales, finance and the warehouse.

Features overview (Essentials pack)

technical starter
accelerator

Simplify data set up and management, connect with the warehouse, integrate with multiple interfaces such as Shopify and Magento to streamline your supply chain.

functional starter
accelerator

Automate frequent interactions between store, warehouse and finance teams to be more agile. Reduce time spent on tasks such as Batch and Transfer management.

item life cycle
accelerator

Simplify catalogue management and life cycles. E.g., control data entry in large product ranges to improve data quality, plus manage processes such as end of life.

product search
accelerator

For high volume and complex product catalogues, this feature provides multiple criteria for your team to quickly and accurately search across to find what they need.

purchase and sales optimization
accelerator

Improve commercial and procurement processes, e.g., support compliance to discounts and supplier agreements and validation of planned purchase orders.

vendor auto evaluation
accelerator

Improve quality of service received from vendors by continuously tracking performance, from data from each interaction (e.g. delivery time, product quality etc.).

Features overview (Advanced pack)

customer channel accelerator

Add a combination of customers on an order, to automate the EDI import when entering the customer's orders. Each customer up the chain is attached to a function (e.g., order by, deliver to, invoice to, paid by, freighted by, credited to etc.).

customer hierarchy accelerator

If you deal with customers that are structured within groups such as: parent, sister, local or international; you can adapt invoicing, logistics and project processes according to the role that various companies within the structure play.

supply chain scan & go for retail accelerator

The information flow across the supply chain needs to be in real-time to maintain optimum customer service levels plus healthy margins and levels on stock. Mobile workflows help across Store restocking, Store reception, Store expediting and Inventory management.

trade agreement accelerator

Companies who deal with multiple suppliers, customers and products need greater flexibility and agility in managing price and trade conditions. The accelerator provides additional flexibility in three key areas: Data management, Pricing engine and Sales analysis.

retail boost accelerator

Optimize the connection between retail store and warehouse to speed up the preparation of items sold in-store and entered on POS. Leverage the power of automations to simplify transfer of data in Dynamics and document management.

Why choose Prodware to support your retail processes with Dynamics 365 Finance and Supply Chain Management?
