

**project
management
accelerator**

Increase the financial visibility and efficiency of your projects to lead a profitable, productive business

If you operate within a project-led business, you will recognize these challenges and subsequent need for best practice:

"We need more financial insights into our projects to drive better business decisions. We need project insights to ensure we deliver our projects within budget."

"We need to avoid repetitive tasks during the set up and creation of Jobs, and the flexibility to work efficiently such as managing and communicating with key project team members and issuing invoices."

The **Project Management accelerator** for **Microsoft Dynamics 365 Business Central** empowers users managing projects or contracts to reduce repetitive actions and to standardize projects in an organization, saving time and reducing errors.

Why choose Prodware to support your project management needs with Dynamics 365 Business Central?

The standard Jobs functionality in Dynamics 365 Business Central is a powerful tool to manage projects and contracts for your organization. This functionality enables users to define project structures (WBS), plan and manage tasks in projects, purchase or manufacture items for a project and manage budgets vs. actuals for a project.

Additionally, delivered work (including time registration), services or products can be invoiced to customers for a project.

Prodware has developed and implemented many Dynamics 365 Business Central projects across Europe and our experienced R&D team have taken the standard functionality a step further to answer needs with this development.

The Project Management accelerator improves standard functionality in key areas:

- ▶ UI/UX
- ▶ Job Contacts, Groups and emails
- ▶ Purchase Orders from a Job
- ▶ Job Billing Plan Templates
- ▶ Job Templates
- ▶ Combined Invoices
- ▶ Job Responsibility Centers
- ▶ Work Classifications
- ▶ Fixed Assets

Contact Prodware to align your Dynamics 365 Business Central system with your daily project processes to keep your project team productive and efficient for on-time delivery that is profitable.
