retail boost accelerator

Optimize the connection between retail store POS and warehouse to improve supply chain efficiency and customer experience

If you are responsible for retail operations, you will recognize these daily supply chain challenges:

"There can be a gap between processes when a customer orders goods in-store, particularly between store and warehouse when preparing stock to be delivered in picking lists and shipped to the customer or store for collection."

"We want to avoid inefficient duplication of documentation, for example it would be better for our retail staff to print off a Sales Order Confirmation for the customer there and then, rather than request from our back office team."

The **Retail Boost accelerator** for **Microsoft Dynamics 365 Finance and Supply Chain Management** leverages the power of automations to simplify the transfer of sales data and document management between POS and Dynamics 365.

Why choose Prodware to support your retail processes with Dynamics 365 Finance and Supply Chain Management?

Prodware has developed and implemented many Dynamics 365 and AX projects across Europe.

Our experienced R&D team work closely with our supply chain clients to develop additional functionalities that suit their needs to boost best practice, productivity and agility.

The Retail Boost accelerator helps in two main areas:

▶ Automation in POS documentation:

- Sales Confirmation
- Sales Picking List
- Sales Delivery Note
- Sales Invoice creation

▶ Workflow automation set up:

- Transfer Order
- Cross Docking and Drop Shipping

Contact Prodware to align your Dynamics 365 Finance and Supply Chain Management system with your daily retail, sales, finance and warehouse processes to keep your retail operations productive, speed up deliveries and keep your customers happy.
