

A service to help you make controlled, fast and innovative progress toward defining and leveraging AI in your business.

01 Why should every organization have an AI roadmap?

When you combine the speed at which Artificial Intelligence technology is becoming available and the fact that adoption occurs at a different rate, many organizations need extra guidance in knowing what is available and what is relevant for their needs.

02 What is AI Advisory?

Our experts guide you through a step-by-step process that ensures you are updated on AI technology and its possibilities, that we understand your current status and challenges and then map AI to your objectives and needs. The result is a concrete roadmap with PoC tailored to your scenario.

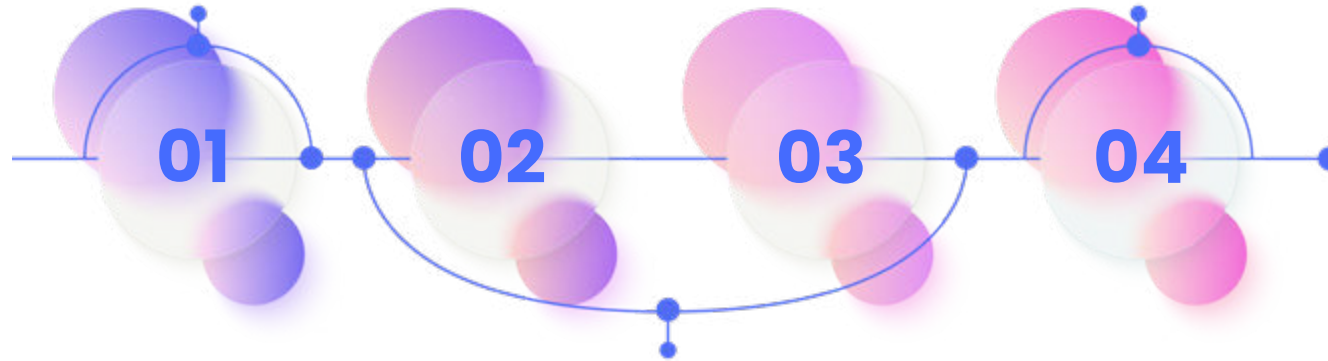

Structure

Our team guides you every step of the way.

1-Information recap: We gather the necessary information to know your main stakeholders, current status, interests and business needs at a high level.

4-AI Roadmap: We extend the content of the workshop, and we deliver an AI Roadmap with prioritized use cases and offers to start with the first PoCs.

2-AI Understanding: We prepare you to understand AI and Gen AI, showing solutions in the market and examples of best practices.

3-Workshop: Interactive session with you to define objectives and build use cases with AI, based on live demos and real examples. *

* Both sessions can be held on the same day, or on different days.

* We recommend to perform (at least) the workshop in-person in our office to increase team engagement.

Ask for a conversation today to connect with our AI experts to support you in driving artificial intelligence as a key part of your transformation journey.

Deliverables

Share information and outcomes with your key stakeholders to drive your AI-infused projects forward.

Training/workshop

All the training and workshop support materials and demos created by Prodware will be shared.

AI Roadmap

Complete report on the topics covered in the AI Advisory, including the diagnosis (AS IS), the definition of strategic objectives (TO BE), and the Gap Analysis including a first taxonomy of use cases and a prioritized roadmap.

First PoC offers

When you are ready to start, Prodware will send an offer attached to the AI Roadmap for the first PoCs.
