

See the future of work, and build a clear path to get there with an expert-led training program.

01 Challenges

I need to understand what AI can deliver today, how to start pragmatically, and whether the ROI justifies investment without overcommitting.

I need to know how AI will impact my daily work, which tasks it can speed up, and whether it will augment my role or change it.

02 Why is structured training needed to embrace AI in the workforce?

Organizations are racing to adopt AI while employees expect it embedded in daily tools, yet skills lag behind. Limited AI literacy and scarce training make adoption uneven and hard to scale.

Prodware AI Envision addresses these challenges in a structured, efficient program. It's the fastest path from curiosity to clarity.

03 What is AI Envision?

Prodware AI Envision is a structured, 5-session awareness, training and activation program designed to give your team a clear, practical understanding of what Artificial Intelligence can do for your organization, with real examples, exercises and demos.

AI Envision includes five variants sharing a common methodology, each tailored to platforms, enabling employees to improve productivity through Copilot and agents across workforce, Dynamics 365, and Sage.

This is not a theoretical overview. Every session, delivered by experts, combines content with live demonstrations and guided exercises, so participants leave with real skills and a concrete picture of where AI fits in their daily work. The program ends with a closing session where we present the results of a structured use-case identification questionnaire, giving you a clear map of where to start and what to prioritize in your own AI adoption journey.

04 What are the five steps in the AI Envision program?

AI Envision typically takes place over 2-4 weeks, below is an example of an AI Envision Workforce program.

Ask for a conversation today to see how you can navigate AI transformation with clarity and confidence with Prodware AI Services.

05 What are the deliverables from an AI Envision program?

AI Envision badge

An online badge certifying each participant as training completed, sent to the users in the closing email.

Session materials

Standardized presentations, exercise booklets, and demo scripts. Uploaded after each session for participant reference.

Teams collaboration site

Set up before the program, active for 30 days after completion. Contains all materials, recordings, and the Q&A channel.

Use-case identification questionnaire

Structured survey completed in session 4, designed to capture where participants see the highest-impact AI opportunities.

5 training sessions

Expert-led sessions combining theory, demonstrations, and guided exercises. Each session recorded and uploaded to the collaboration site.

AI Envision report

Delivered within five business days, the report summarizes participants, insights, prioritized use cases, and recommended next steps.
